

# OnGuard® Credentials module

## Browser-Based Cardholder Management for OnGuard Systems

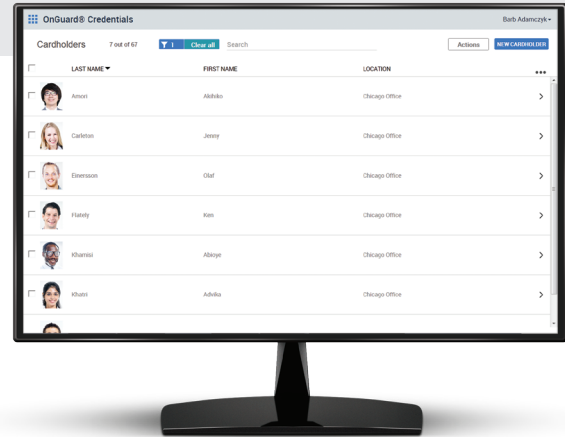

No client software installation required

### Overview

OnGuard® Credentials offers a browser-based alternative to the traditional OnGuard ID CredentialCenter Windows® application, enabling cardholder, badge, and access level management without client installation and upgrades. Users can securely access credentialing through a web browser on their desktop, laptop or tablet, no matter what operating system or mobile platform they use.

Based on the latest HTML5 standards, the OnGuard Credentials module features a responsive user interface and supports a wide range of client platforms. It even enables photo capture through the camera on a tablet, as well as through a built-in or USB-attached camera on a laptop or desktop computer.

Designed with the user in mind, this flexible module provides a fresh take on cardholder and access rights management. A list of cardholders with simple sorting and rich filtering options is always visible, while a scrollable pane with expandable sections for cardholder, badge, and access level information puts all critical information at your fingertips.

### Features & Functionality

- Presentation of cardholder, badge, and access level information for an individual on a single page
- Option to customize cardholder list view by adding, removing and rearranging columns
- Sortable list of cardholders with single-click sorting
- Cardholder list that shows photo thumbnails for quick reference and identification
- Photo capture via connected camera on supported browsers
- Option to crop, rotate and compress cardholder images
- Full support for OnGuard user-defined fields and cardholder detail pages
- Modern search-as-you-type (incremental search) results for cardholders, badges and access levels
- Flexible, powerful list filtering
- Deep-linking that allows you to jump to and bookmark screens of interest, streamlining processes
- Ability to seamlessly issue mobile credentials to iOS and Android™ devices

## Browser Capabilities

Browser	Camera Support
Google Chrome™	Yes
Microsoft Edge®	Yes
Microsoft Internet Explorer® 11	No
Apple Safari® iOS	Yes
Apple Safari® OS X	No

## Prerequisites for the OnGuard Credentials Module

- OnGuard® 7.3 or higher
- Valid OnGuard Software Upgrade and Support Plan (SUSP) for the full term of the OnGuard Credentials license
- OnGuard server with Port 8080 open for client connections
- For OnGuard Enterprise system, OnGuard Credentials can be purchased and installed on any region or master

Please note: OnGuard Credentials is licensed on an annual-renewal basis, and your subscription entitles you to install the latest version of OnGuard Credentials.

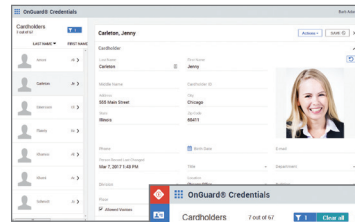

## ID CredentialCenter Features

### Not included in OnGuard Credentials

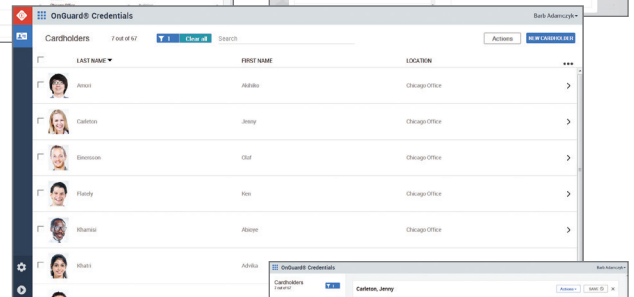

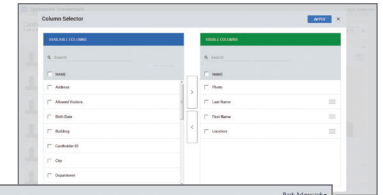

Some features require the installation of the OnGuard ID CredentialCenter program on a Windows PC. A single OnGuard installation can support both the OnGuard Credentials module and ID CredentialCenter clients.

- Smartcard and magstripe encoding
- Badge printing
- Biometric capture & template management
- Cardholder/Directory configuration
- Asset management
- Precision access
